Professional Summary

Technical leader and Certified ScrumMaster® with 8+ years of experience delivering enterprise ERP, systems administration, automation, and data solutions in higher education. Expertise spans Ellucian Banner, Oracle PL/SQL, enterprise platforms, workflow automation, systems integration, and cross-functional project leadership. Holds a Master of Science in Computer Science with a Graduate Certificate in Autonomous Systems and a proven record of improving operational efficiency, regulatory compliance, and enterprise technology outcomes.

Technical Skills

Programming & Scripting: PL/SQL, SQL, Java, JavaScript, Python, HTML/CSS

Databases: Oracle Database, SQL Server

ERP, CRM & Enterprise Systems: Ellucian Banner, Raiser's Edge CRM, Microsoft 365, Google Workspace

Tools & Platforms: Automic (UC4), Cognos, TeamDynamix, Salesforce Marketing Cloud, Visual Studio

Methodologies: Agile, Scrum, SDLC, Business Process Analysis, Workflow Automation, Data Integration, Job Control Scripting, Technical Documentation

Experience

Programmer Analyst, Team Lead

University of Dayton – UDiT: ERP Systems | Apr 2025 – Present

- Lead enterprise Banner ERP development initiatives using Oracle PL/SQL and Automic UC4 across HR, Finance, and Student modules.
- Design reusable procedures, data integrations, dynamic job flows, and test-safe environment controls to improve batch reliability, system maintainability, and deployment stability.
- Automate Banner ERP processes, data integrations, and communication workflows across multiple functional areas, saving 200+ hours annually in manual processing and support effort.
- Support federal data exports, financial aid communications, and Federal Tax Information (FTI) compliance processes, improving compliance readiness and operational accuracy.
- Lead cross-functional ERP initiatives from requirements gathering through deployment, partnering with Registrar, Financial Aid, HR, and campus stakeholders.
- Apply Agile and Scrum methodologies to project planning, backlog prioritization, and team coordination while mentoring junior analysts and reducing rework.

Senior System Administrator

University of Dayton – UDiT: Enterprise Platforms | Jan 2022 – Apr 2025

- Automated workflows for Student Success, HR, Finance, Registrar, and IT, saving 500+ hours annually.
- Improved security by mitigating phishing attacks via Google Admin and streamlining SaaS license governance.
- Deployed fully automated faculty, staff, and student forms, reducing funding errors and processing delays.

Information Systems Specialist

University of Dayton – Advancement IT | Oct 2019 – Jan 2022

- Built optimized SQL queries and real-time dashboards to track alumni and donor activity.
- Managed tickets and automation in TeamDynamix to support fundraising and advancement operations, reducing workloads by 50+ hours annually.
- Supported Advancement's email communications using Salesforce Marketing Cloud and Raiser's Edge CRM.

Database Specialist (Contractor, Remote)

Medical University of South Carolina – Advancement | Oct 2021 – Present

- Improve Raiser's Edge CRM query and reporting processes, saving 100+ hours annually while ensuring clean exports for targeted outreach.
- Maintain and enhance database integrity by investigating and updating constituent records, ensuring a clean and reliable data set.

Additional Experience

Guest Service Manager, Workforce Admin, Event Specialist

Walt Disney World & University of Dayton Events (2012–2019)

- Led operational teams, managed workforce planning, and delivered process improvement initiatives in high-volume service environments.
